Application/Control Number: 09/892,426

Art Unit: 2818

The election filed December 20, 2004 has been entered and made of record as paper no. 1204.

Applicant's election with traverse of claims 1-6 in the reply filed on December 20, 2004 is acknowledged. The traversal is on the ground(s) that "claims 7-14 are directed to An Active Pixel CMOS image sensor device including at least one pixel circuit. This at least one pixel circuit may be the active pixel cmos image sensor device including at least one pixel circuit of Claim 1". This is not found persuasive because claim 7 does not have the pixel circuit comprising at least two transistors in which one transistror is used for resetting the body of another transistor as defined in claim 1.

The requirement is still deemed proper and is therefore made FINAL.

This application is in condition for allowance except for the following formal matters:

The abstract is objected to because it should avoid using phrases which can be implied, such as, "The present invention describes".

Non-elected claims 7-14 must be canceled.

Prosecution on the merits is closed in accordance with the practice under *Ex* parte Quayle, 1935 C.D. 11, 453 O.G. 213.

A shortened statutory period for reply to this action is set to expire **TWO**MONTHS from the mailing date of this letter.
